E-PRESCRIBING INFORMATION SHEET

What is E-prescribing and Why Does Legacy Community Health E-Prescribe?

E-Prescriptions, E-Rx or Electronic Prescriptions, are computer-generated prescriptions created by your provider and sent directly to your pharmacy. Legacy participates in E-prescribing because we care about your health and well-being and E-prescribing has multiple benefits.

What are the benefits to me?

By providing your consent, Legacy will be able to see all of the current and past prescriptions you have received from other health care organization. This critical information will assist Legacy in confirming the safety of your prescription and minimize dangerous interactions with other medications you are taking. Your health and safety is our top priority and electronic prescriptions will decrease the likelihood of misreading or misinterpreting handwriting or directions. An increased convenience is your e-prescription will be sent directly to your pharmacy for pickup at your convenience.

Will all of my prescriptions go to the pharmacy by E-prescribing?

By law, some medications cannot be prescribed electronically and will still require a written prescription to be filled. Most pharmacies in the area are able to receive electronic prescriptions, but Legacy cannot guarantee that the pharmacy you choose will be equipped to do so. If the pharmacy you chose is not equipped to accept electronic prescriptions, you will receive your prescription on paper and will need to take it to your pharmacy.

How does E-Prescribing Work?

Instead of writing out your prescription on a piece of paper, your provider enters it directly into the computer. Your prescription travels from your doctor's computer to the pharmacy's computer. E-prescriptions are sent electronically through a private, secure, and closed network and not over the Internet or as email. The e- prescription can be sent to the pharmacy you choose. If you do not want your prescription sent electronically, or your pharmacy does not accept e-prescriptions, your provider can print your prescriptions for you as before.

Privacy and Security

The privacy of your personal health information contained in all your prescriptions, whether written or electronic, is protected by federal and state laws. The federal law is the Health Insurance Portability and Accountability Act (HIPAA). HIPAA requires that your personal health information be shared only for the purpose of providing you with clinical care and E-prescriptions meet this requirement. The prescriptions transmitted are secured by firewalls and encryption systems to preserve your privacy and security.
